

Homework Year 5 23.1.26

Talk Homework

What do you think it would be like to walk on the Moon?

Which planet in our solar system do you find the most interesting, and why?

Why do you think Earth is the only planet we know of with people and animals living on it?

What do you think stars are made of, and why do they shine at night?

If you could travel into space, where would you go first and what would you want to see?

Reading Homework

Please read daily (for at least 10 minutes). Log your reading in your reading record book. Over the course of the term, please try and read texts from across different genres (e.g. non-fiction, poetry, biographies and science-fiction).

Spellings Homework

Please practise your weekly spellings which have been given to you in your spelling book.

It is so nice to see so many of you improving your scores each week. All that practising at home is paying off!

Number Homework

Login to Times Tables Rock Stars and complete 20 minutes in the Studio.
